PROJECTS

Capstone 2024-2024
Web-Based Class Schedule and Appointment System

Developed a prototype of a web-based platform designed to improve communication and efficiency in educational settings.

The system includes:

- Student and instructor accounts for managing schedules and appointments.
- Real-time updates on class schedules.
- File upload and download for activities.
- Messaging system for interactive communication.

Technologies used: (Plain) html, css, javascript, php, mysql xampp.

Freelancing 2022-2023
Simple project/works

Throughout my time as a student, I offered freelance services helping with a variety of tasks. This included creating personal websites, simple games, and sales/inventory systems using VB.NET. I also assisted with PowerPoint presentations, Word documents, and other school-related assignments.
